Abstrak

Health is the main capital needed by humans. Humans will continue to try to meet their physical and spiritual needs. Good health is health that is felt by all citizens in each country, of course Health Workers have an important role, in this case both Doctors, Pharmacists, Nurses and other Health Workers.

Pharmacists are professionals in the health sector whose role is to provide information about medicines to be consumed, ensure that all production processes in the industry comply with GMP and are responsible for implementing drug distribution. Through Work Practice, it is hoped that prospective pharmacists can understand what their duties and responsibilities are. Divided into 2 areas of specialization, namely industry and service. The practicals are held from March to October 2022. The practicums are carried out at PT Aventis Pharma, Kimia Farma K2 382 Pharmacy, Fatmawati Hospital, Kimia Farma Trading & Distribution Jakarta 3, and the Jatinegara Health Center as an illustration of the role of pharmacists in industry, distribution and service. Apart from learning directly from observing, prospective pharmacists are also given the opportunity to analyze the problems that exist in each workplace. Therefore, this internship report will discuss the problems and solutions proposed in each workplace.

..... Kesehatan merupakan modal utama yang dibutuhkan oleh manusia. Manusia akan terus berusaha memenuhi kebutuhan akan jasmani dan rohaninya. Kesehatan yang baik ialah kesehatan yang dirasakan oleh seluruh warga disetiap negaranya, tentunya Tenaga Kesehatan memiliki peranan yang penting, dalam hal ini baik Dokter, Apoteker, Perawat maupun Tenaga Kesehatan lainnya. Apoteker merupakan profesional di bidang kesehatan yang berperan dalam memberikan informasi tentang obat-obatan yang akan dikonsumsi, memastikan bahwa segala proses produksi di industri sesuai dengan CPOB dan menjadi penanggung jawab pada pelaksanaan distribusi obat. Melalui Praktik Kerja, diharapkan calon apoteker dapat memahami apa yang menjadi tugas dan tanggung jawabnya. Terbagi atas 2 bidang peminatan yaitu industri dan pelayanan. Praktik dilaksanakan dari bulan Maret hingga Oktober 2022. Praktik kerja dilakukan di PT Aventis Pharma, Apotek Kimia Farma K2 382, RSUP Fatmawati, Kimia Farma Trading & Distribution Jakarta 3, dan Puskesmas Jatinegara sebagai gambaran peran apoteker dibidang industri, distribusi maupun pelayanan. Selain belajar secara langsung dari mengamati, calon apoteker juga diberikan kesempatan untuk menganalisis masalah yang ada di masing-masing tempat kerja. Oleh karena itu, laporan praktik kerja ini akan membahas mengenai masalah beserta solusi yang diajukan di tiap tempat praktik kerja.
