Abstrak

Laporan PKPA ini membahas kegiatan praktik kefarmasian di instalasi kesehatan yaitu Puskesmas Kecamatan Cengkareng. Kegiatan yang dilakukan dari managerial perbekalan farmasi hingga pelayanan klinis, serta project yang dilakukan berupa edukasi dengan media cetak tentang salah satu penyakit yang memiliki jumlah penderita tertinggi yaitu diabetes mellitus di Puskesmas Kecamatan Cengkareng. Harapan setelah selesai PKPA, media cetak berupa standing banner dan leaflet dapat terus diakses oleh pasien dan meningkatkan kepatuhan, kesadaran dan taraf kesehatan masyarakat di sekitar Puskesmas Kecamatan Cengkareng.

.....This PKPA report discusses pharmaceutical practice activities in health center, namely the Cengkareng District Health Center. Activities carried out from managerial pharmaceutical supplies to clinical services, as well as projects carried out in the form of education with print media about one of the diseases that have the highest number of sufferers, namely diabetes mellitus at the Cengkareng District Health Center. It is hoped that after the completion of PKPA, print media in the form of standing banners and leaflets can continue to be accessed by patients and increase compliance, awareness and public health standards around the Cengkareng District Health Center.
