Abstrak

AIDS (Acquired Immunodeficiency Syndrome) disebabkan oleh HIV (Human Immunodeficiency Virus) mengakibatkan menurunnya sistem imun sehingga rentan terhadap berbagai penyakit seperti tuberkulosis. Tuberkulosis merupakan penyakit infeksi bakteri *Mycobacterium tuberculosis* yang dapat menginfeksi pleura, kelenjar limfa, tulang dan parenkim paru.

.....AIDS (Acquired Immunodeficiency Syndrome) is caused by HIV (Human Immunodeficiency Virus) resulting in a decrease in the immune system making it susceptible to various diseases such as tuberculosis. Tuberculosis is an infectious disease of the *Mycobacterium tuberculosis* bacteria which can infect the pleura, lymph nodes, bones and lung parenchyma.
