Abstrak

Penelitian ini bertujuan untuk melihat bagaimana perencanaan dan penganggaran pada masa tanggap darurat di Badan Nasional Penanggulangan Bencana dan membangun kerangka perencanaan dan penganggaran responsif gender dalam masa tanggap darurat di Badan Nasional Penanggulangan Bencana. Penelitian ini menggunakan pendekatan post positivisme dengan metode kualitatif. Pengumpulan data dilakukan dengan dengan (1) telaah dokumen kebijakan strategis Badan Nasional Penanggulangan Bencana yaitu Renstra K/L, Renja, RKA K/L, dan DIPA BNPB, dan (2) wawancara dengan pemangku kebijakan di Badan Nasional Penanggulangan Bencana, serta instansi terkait. Hasil penelitian menunjukkan bahwa belum dilaksanakan perencanaan dan penganggaran responsif gender di Badan Nasional Penanggulangan Bencana, maka dari itu kerangka perencanaan dan penganggaran responsif gender pada masa tanggap darurat perlu dibangun dengan mempertimbangkan konsep dan peran gender pada masa tanggap darurat.

.....This study aims to look at how planning and budgeting during the emergency response period at the National Disaster Management Agency and build a framework for gender responsive planning and budgeting during the emergency response period at the National Disaster Management Agency. This study uses a post positivism approach with qualitative methods. Data collection was carried out by (1) reviewing the strategic policy documents of the National Disaster Management Agency, namely Strategic Plan for Ministries / Agencies, Work Plan, RKA K / L, and Budget Document of BNPB, and (2) interviews with stakeholders in the National Disaster Management Agency, and related agencies . The results of the study show that gender responsive planning and budgeting has not yet been implemented in the National Disaster Management Agency, hence the gender responsive planning and budgeting framework in the emergency response period needs to be built by considering the concepts and roles of gender during the emergency response period.
