Abstrak

Pedagang Besar Farmasi (PBF) wajib menerapkan Pedoman Teknis Cara Distribusi Obat yang Baik (CDOB). Salah satu tugas apoteker di PBF adalah memastikan penerapan CDOB dijalankan. Untuk memahami tugas tersebut, dilakukan analisis GAP terkait proses distribusi sediaan psikotropika di National Distribution Center (NDC) dengan pedoman CDOB. Dilakukan perbandingan terkait proses pendistribusian produk psikotropika yang diterapkan di NDC dengan CDOB, lalu ditarik kesimpulan mengenai kesesuaian penerapannya. Dari analisis yang dilakukan, dapat diketahui bahwa aktual proses distribusi produk psikotropika di National Distribution Centre PT. Anugerah Pharmindo Lestari dimulai dari penerimaan, penyimpanan, dan penyaluran telah terlaksana dengan baik sesuai dengan Peraturan Badan Pengawas Obat dan Makanan Nomor 6 Tahun 2020.

.....Major Pharmaceutical Suppliers (PBF) are required to implement the Technical Guidelines for Good Drug Distribution Methods (CDOB). One of the duties of the pharmacist at PBF is to ensure that CDOB is implemented. To understand this task, a GAP analysis was carried out regarding the process of distributing psychotropic preparations at the National Distribution Center (NDC) with CDOB guidelines. Comparisons were made regarding the process of distributing psychotropic products implemented in NDC and CDOB, then conclusions were drawn regarding the suitability of their application. From the analysis carried out, it can be seen that the actual process of distributing psychotropic products at the National Distribution Center of PT. Anugerah Pharmindo Lestari starting from reception, storage, and distribution has been carried out properly by the Regulation of the Food and Drug Supervisory Agency Number 6 of 2020.
