Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=9999920532893&lokasi=lokal>

Abstrak

Kesesuaian peresepan obat dengan formularium puskesmas adalah faktor penting dalam memastikan kualitas pengobatan pasien dan penggunaan sumber daya kesehatan secara efektif. Namun, dapat terjadi ketidaksesuaian dalam peresepan obat dengan formularium yang dapat mempengaruhi efektivitas pengobatan dan pengelolaan sumber daya. Oleh karena itu, penelitian ini bertujuan untuk memastikan seluruh peresepan obat di Puskesmas Kecamatan Ciracas dilakukan sesuai berdasar pada formularium puskesmas. Laporan kesesuaian peresepan obat dengan Formularium Puskesmas Kecamatan Ciracas dianalisis dan diolah, lalu dibuat rencana tindak lanjutnya. Pengambilan jumlah sampel berasal dari data jumlah kunjungan resep pada bulan sebelumnya menggunakan metode Sample Size Calculator Survey monkey. Selanjutnya, dihitung persentase kesesuaian peresepan terhadap formularium puskesmas. Seluruh peresepan obat di Puskesmas Kecamatan Ciracas periode bulan Januari – April 2023 sudah sesuai formularium puskesmas dengan nilai persentase kesesuaiannya adalah 100%. Pengkajian dan peninjauan kesesuaian peresepan di puskesmas terhadap formularium diharapkan dapat dipertahankan agar obat yang diberikan sesuai dengan formularium puskesmas.

..... Conformity of drug prescriptions with the district health center formulary is an important factor in ensuring the quality of patient treatment and the effective use of health resources. However, there may be discrepancies in drug prescribing with the formulary which can affect the effectiveness of treatment and resource management. Therefore, this study aims to ensure that all drug prescriptions at the Ciracas District Health Center are carried out according to its formulary. Reports on the conformity of drug prescriptions with the Ciracas District Health Center Formulary were analyzed and processed, then a follow-up plan was made. Data collection for the number of samples came from the number of prescription visits in the previous month using the Sample Size Calculator Survey monkey method. Next, the percentage of conformity of prescriptions to the formulary was calculated. All drug prescriptions at the Ciracas District Health Center for the period January - April 2023 are in accordance with the puskesmas formulary with a percentage value of conformity of 100%. It is expected that it will be possible to maintain the suitability of prescriptions at the district health center to the formulary so that the drugs given are in accordance with its formulary.
