----

Abstrak

In this major project, the lecturer was asking us to create or build a model, business, or anything that's never been discovered in Australia. After careful consideration, I decide to go with creating a new model that can be sold after. In this assignment, I am going to discuss about a common problem that happens to anyone and how PortaHome can solve those problems. In addition, this assignment is supported with 3D model and analysis surveys, thus strengthen the argument regarding the mentioned model.
