This case study finds that the implementation of revenue recognition for the PT XYZ membership program is not in accordance with PSAK 23 for 2019 and PSAK 72 for 2020. The entity recognizes income from the program as direct income when cash is received. Meanwhile, according to the provisions of PSAK 23 and PSAK 72, income is allocated according to the benefit period. These differences in revenue recognition have an impact on financial statements.
