Abstrak

Apotek merupakan sarana pelayanan kefarmasian tempat dilakukannya praktik kefarmasian oleh apoteker. Apotek roxy adalah sebuah perusahaan yang bergerak dalam bidang jasa penjualan obat-obatan. Standar pelayanan kefarmasian di apotek terdiri dari pelayanan farmasi klinik dan pengelolaan sediaan farmasi. Pengelolaan sediaan farmasi tersebut terdapat poin terkait penyimpanan obat. Penerapan praktik penyimpanan ketersediaan obat sangat penting untuk menunjang pelayanan kefarmasian yang optimal. Tujuan dilakukan tugas khusus ini yaitu untuk mengetahui dan meningkatkan pemahaman terkait sistem penyimpanan obat di Apotek Roxy Biak dan mengetahui besar persentase kesesuaian sistem penyimpanan obat di Apotek Roxy Biak berdasarkan Standar Pelayanan Kefarmasian. Metode yang digunakan yaitu observasional dan bersifat deskriptif dengan melakukan pengamatan terhadap kegiatan yang sedang berlangsung dan wawancara kepada apoteker pendamping. Hasil yang didapat berupa persentase dan ditentukan kriterianya. Berdasarkan pengamatan yang dilakukan terhadap sistem penyimpanan obat di Apotek Roxy Biak didapatkan bahwa sistem penyimpanan yang dilakukan sudah sesuai dengan Petunjuk Teknis Standar Pelayanan Kefarmasian di Apotek yakni sebesar 82,61% (sangat baik).

.....

A pharmacy is a pharmaceutical service facility where pharmaceutical practice is carried out by pharmacists. Roxy Pharmacy is a company that operates in the field of pharmaceutical sales services. Pharmaceutical service standards in pharmacies consist of clinical pharmacy services and management of pharmaceutical preparations. Management of pharmaceutical preparations includes points related to drug storage. The implementation of drug storage practices is very important to support optimal pharmaceutical services. The aim of carrying out this special task is to find out and increase understanding regarding the drug storage system at the Roxy Biak Pharmacy and to find out the percentage of suitability of the drug storage system at the Roxy Biak Pharmacy based on Pharmaceutical Service Standards. The method used is observational and descriptive by observing ongoing activities and interviews with accompanying pharmacists. The results obtained are in the form of percentages and the criteria are determined. Based on observations made on the drug storage system at the Roxy Biak Pharmacy, it was found that the storage system implemented was in accordance with the Technical Instructions for Pharmaceutical Service Standards in Pharmacies, that is 82.61% (very good).
