Abstrak

Laporan ini membahas peran apoteker sebagai penanggung jawab dalam pengelolaan sediaan farmasi di Pusat Distribusi Farmasi (PBF), terutama terkait produk narkotika. PKPA dilaksanakan di KFTD Cabang Jakarta 2 untuk memahami praktik pengadaan, penyimpanan, dan distribusi produk farmasi sesuai dengan peraturan perundang-undangan dan standar CDOB (Cara Distribusi Obat yang Baik) dan SOAP (Standar Operasional Prosedur). Metode studi literatur dan pengamatan langsung digunakan untuk mengevaluasi implementasi pengelolaan produk narkotika di KFTD 2. Hasilnya menunjukkan bahwa pengelolaan produk narkotika di KFTD 2 telah mematuhi ketentuan yang berlaku, dengan apoteker memainkan peran sentral dalam memastikan kepatuhan terhadap proses distribusi. Meskipun demikian, PKPA berdurasi singkat mengakibatkan keterbatasan dalam pemahaman mahasiswa PKPA terhadap proses seperti stock opname dan pelaporan narkotika bulanan. Oleh karena itu, diperlukan upaya untuk mengoptimalkan waktu yang tersedia agar mahasiswa PKPA dapat memperoleh pengetahuan yang komprehensif dalam praktik distribusi farmasi, khususnya produk narkotika.

.....

This report discusses the pharmacist's role as the responsible party in managing pharmaceutical preparations at the Pharmaceutical Distribution Center (PBF), particularly concerning narcotic products. The Pharmacist Professional Internship (was conducted at KFTD Branch Jakarta 2 to understand the practices of procurement, storage, and distribution of pharmaceutical products in accordance with legal regulations and Good Distribution Practices (CDOB) and Standard Operating Procedures (SOP). Literature review and direct observation methods were employed to evaluate the implementation of narcotic product management at KFTD 2. The results indicated that the management of narcotic products at KFTD 2 complied with applicable regulations, with pharmacists playing a central role in ensuring compliance with distribution processes. However, the short duration of practiced resulted in limitations in students' understanding of processes such as stock-taking and monthly narcotic reporting. Therefore, efforts are needed to optimize the available time so that PKPA students can acquire comprehensive knowledge in pharmaceutical distribution practices, especially regarding narcotic products.
