Abstrak

Apoteker bertanggung jawab mengendalikan sediaan farmasi, alat kesehatan, dan BMHP di Rumah Sakit, memastikan kegiatan perbekalan sesuai standar dan menjamin kualitas, efikasi, serta keamanan. Mereka juga berperan penting di Central Operating Theatre (COT) dalam memastikan penggunaan obat dan pasokan medis yang aman dan efektif selama pembedahan. COT di RSUI telah melayani berbagai prosedur bedah sejak 2019, termasuk Ureteroscopy (URS), yang memerlukan obat dan BMHP khusus. Untuk meningkatkan efisiensi dan efektivitas pengendalian, unit farmasi menyediakan paket standar sesuai prosedur bedah. Hasil evaluasi menunjukkan bahwa penggunaan obat dan BMHP terhadap paket standar URS selama periode Juni hingga Agustus 2023 memiliki rata – rata persentase kesesuaian yang rendah (65,17%). Dari 29 tindakan URS pada pasien, hanya 3% data penggunaan obat/BMHP oleh pasien yang sesuai dengan paket standar yang telah ditetapkan oleh depo farmasi Central Operating Theater RSUI. Selain itu, hasil analisis juga menunjukkan bahwa sekitar 17% dari penggunaan per-item telah sesuai dengan standar paket tindakan URS yang tersedia. Namun, sebagian besar jenis item menunjukkan penggunaan dengan jumlah di luar paket standar (83%) terutama dalam jumlah penggunaan item obat/BMHP yang umumnya lebih rendah dari jumlah yang terdapat pada paket standar tindakan URS (79%).

.....

Pharmacists are responsible for controlling pharmaceutical preparations, medical devices, and other pharmaceutical products in hospitals, ensuring supply activities are in accordance with standards and guaranteeing quality, efficacy, and safety. They also play an important role in the Central Operating Theater (COT) in ensuring the safe and effective use of drugs and medical supplies during surgery. The COT at RSUI has served various surgical procedures since 2019, including Ureteroscopy (URS), which requires specialized drugs and others pharmaceutical products. To improve control efficiency and effectiveness, the pharmacy unit provides standardized packages according to surgical procedures. The evaluation results showed that the use of drugs and pharmaceutical products against the URS standard package during the period June to August 2023 had a low average percentage of conformity (65.17%). Of the 29 URS actions on patients, only 3% of the data on the use of drugs / others pharmaceutical products by patients were in accordance with the standard package set by the Central Operating Theater pharmacy depot RSUI. In addition, the results of the analysis also showed that approximately 17% of the per-item use was in accordance with the standard URS action package available. However, most of the items showed usage with amounts outside the standard package (83%), especially in the number of drug/ others pharmaceutical products items that were generally lower than the amount contained in the standard URS action package (79%).
