Abstrak

Segala pekerjaan dan pelayanan kefarmasian dilaksanakan oleh Apoteker. Suatu cara dalam meraih gelar Apoteker adalah dengan mengemban suatu pendidikan di program studi profesi Apoteker dan untuk mencapainya diperlukan suatu tahapan Praktik Kerja Profesi Apoteker (PKPA) di suatu instansi kefarmasian. Apoteker memiliki peran penting yang sangat dibutuhkan di berbagai fasilitas kefarmasian, salah satunya di suatu apotek. Praktik Kerja Profesi Apoteker dilaksanakan sebagai wadah pembelajaran yang bisa menambah wawasan, pengetahuan, pengalaman dan pelatihan dalam menghadapi dunia pekerjaan kefarmasian. Laporan tugas khusus merupakan salah satu aspek penting dalam pelaksanaan praktik kerja ini. Pratik Kerja Profesi Apoteker pada laporan ini dilaksanakan di Apotek Roxy Sawangan Depok pada periode Februari 2022. Penulisan laporan tugas khusus dilakukan dengan memilih secara manual resep gastritis yang disertai obat psikotropika yang ditebus oleh para pasien di Apotek Roxy Sawangan.

.....

All pharmaceutical services are performed by pharmacists. One method to achieve the title of Pharmacist requires an education in the Pharmacist professional study program, where it includes internship program in some health facilities in the credit study. Pharmacists have an important role needed in various health facilities, one of which is a pharmacy. The purpose of the internship is not only gain and increase insight, knowledge, and experience, but also to prepare future pharmacists in facing the world of pharmaceutical work. Special assignment reports are an important aspect in implementing this internship. The Pharmacist Professional Work Practice in this report was completed at the Roxy Sawangan Pharmacy Depok in the February 2022 period. The report was carried out by manually selecting gastritis prescriptions accompanied by psychotropic drugs that were purchased by patients at the Roxy Sawangan Pharmacy.
