Abstrak

Alat kesehatan adalah elemen esensial dalam pelayanan kesehatan, sejalan dengan kemajuan teknologi informasi yang mempengaruhi perkembangannya dari teknologi sederhana hingga canggih. Dalam mendukung pencapaian Sustainable Development Goals (SDGs), khususnya tujuan ketiga tentang kesehatan, alat kesehatan memiliki peran vital. Penyalur Alat Kesehatan (PAK) berperan penting dalam memastikan keamanan, mutu, dan manfaat alat kesehatan. Penerapan Cara Distribusi Alat Kesehatan yang Baik (CDAKB) merupakan kewajiban bagi PAK dan cabangnya dalam proses distribusi alat kesehatan sesuai peraturan perundang-undangan. Studi ini menganalisis kesesuaian implementasi CDAKB pada PT Kimia Farma Trading & Distribution (KFTD) Jakarta 2, yang meliputi proses penerimaan, pengiriman, dan penyerahan alat kesehatan. Hasil analisis menunjukkan bahwa KFTD Jakarta 2 telah menerapkan CDAKB dengan baik sesuai pedoman yang berlaku, termasuk dalam pengecekan, penyimpanan, dan distribusi alat kesehatan.

Medical devices are essential components in healthcare services, alongside healthcare professionals and medicines. As technology evolves, ranging from simple to advanced technologies, medical devices are increasingly used in both healthcare facilities and households. They are crucial for achieving the Sustainable Development Goals (SDGs), particularly Goal 3, which aims to ensure healthy lives and promote well-being for all at all ages. The need for medical devices is matched by the development and contribution of Medical Device Distributors. These distributors and their branches play a vital role in ensuring the safety, quality, and efficacy of medical devices available to the public. A Medical Device Distributor is a legal entity authorized to procure, store, and distribute medical devices in bulk by applicable regulations. All distributors and their branches are required to implement the Good Distribution Practice for Medical Devices (GDPMD) as outlined by the Ministry of Health. Kimia Farma Trading & Distribution Jakarta 2 (KFTD) is a distributor that applies the principles of Good Distribution Practice (GDP) through certification of Good Distribution of Medicines (GDPM) and GDPMD. This study analyzes the compliance of KFTD Jakarta 2 with GDPMD standards concerning the receipt, delivery, and distribution of medical devices. The analysis reveals that KFTD Jakarta 2 adheres to GDPMD guidelines for the acceptance, shipment, and delivery of medical devices, including checking, storage, and distribution processes.
