#### **Abstrak**

Skripsi ini membahas bagaimana dampak Ekowisata yang dikembangkan oleh Taman Nasional Gunung Gede Pangrango bagi kesejahteraan masyarakat desa penyangga khususnya di Desa Sukatani. Penelitian ini adalah penelitian kualitatif dengan desain deskriptif. Teknik penelitian ini menggunakan Snowball Sampling. Penelitian dilakukan pada tahun 2021, pencarian data dilakukan secara daring dan luring, tinjauan literatur dilakukan secara daring dan wawancara mendalam dilakukan secara daring dan luring dengan lima orang informan. Hasil penelitian menyarankan bahwa pihak pengelola Taman Nasional Gunung Gede Pangrango perlu mengevaluasi program Ekowisata yang dikembangkan; pemerintah Desa Sukatani juga harus terlibat dalam upaya pengembangan Ekowisata; pengusaha jasa ekowisata dan masyarakat harus segera menyelesaikan permasalahan yang ada di lingkungan desa akibat dari adanya Ekowisata.

.....This study discusses how the impact of Ecotourism developed by Gunung Gede Pangrango National Park for the welfare of the buffer village community, especially in Sukatani Village. This study is a qualitative research with a descriptive design. This research technique uses Snowball Sampling. The research was conducted in 2021, data searches were conducted online and offline, literature reviews were conducted online and in-depth interviews were conducted mixed online and offline with five. The results of the study suggest that the manager of the Gunung Gede Pangrango National Park needs to evaluate the developed Ecotourism program; Sukatani Village government should also be involved in efforts to develop Ecotourism; Ecotourism service entrepreneurs and the community must immediately resolve the problems that exist in the village environment as a result of the existence of ecotourism.
