

The dynamism of stakeholder engagement: A case study of the aviation industry

Kivits, Robbert, author

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=9999920567483&lokasi=lokal>

Abstrak

Large infrastructure projects generally involve multiple stakeholders such as government parties, local communities, and private organizations. New projects can create tensions between different stakeholder groups because different groups naturally have different interests and opinions. This book offers a view of how stakeholders are able to influence the project management's decisionmaking process as the project proceeds from the investment preparation phase, to the project execution phase, and on to the operations phase through various methods such as protests, legal battles, and even illegal activities. This book provides multiple case studies in aviation industry reflecting how large projects create dynamic contexts for stakeholder management and stakeholder behaviour as the project moves through different phases of its lifecycle.
