Abstrak

Digital transformation has companies firmly in its grip. Digitalization has a multidimensional impact on the management accounting function and is changing management accounting processes, controlling methods and the role of the management accountant. This edited work shows how the opportunities of digitalization can be used in a way that adds value to the management accounting function. The authors describe individual dimensions of digitalization in management accounting and convey the necessary fundamentals and concepts. Use cases from controlling practice complement the theoretical foundations and show cross-industry approaches to solutions.
