Introduction

1. This report summarizes global levels and trends in the population of concern to UNHCR: refugees, asylum-seekers, stateless, and others of concern. The data, reported by UNHCR country offices, generally reflect the view of the host country. The statistics contained in this note should be considered provisional and subject to change.

2. This note provides only the main global trends. For detailed statistics on 2004, see <http://www.unhcr.org/statistics>.

Total population of concern

3. The total population of concern to UNHCR¹ increased from 17.0 million persons at the end of 2003 to 19.2 million by the end of 2004 (+13%). Refugees constitute 48 per cent of the total population of concern to UNHCR, down from 56 per cent by end-2003 (*see chart below*). However, the total population of concern to UNHCR is not totally reflected in these figures as an important part of the stateless populations have not been systematically identified, or statistical data is unavailable despite renewed efforts on the part of UNHCR.

¹ Include: Refugees, Asylum-seekers, Returnees (returned refugees), Internally Displaced Persons (IDPs), Returned IDPs, and Various (a.o. Stateless persons).

Refugee population

4. By the end of 2004, the global number of refugees reached an estimated 9.2 million persons². This constitutes a net decrease of approximately 356,000 refugees (-4%) since the beginning of 2004, when 9.6 million refugees were recorded.

5. About half (54%) of all refugees benefit from UNHCR assistance programmes. The number of refugees directly assisted through UNHCR fell by 175,000 persons (-3%) to 5.0 million refugees by the end of the year.

6. This is the fourth consecutive year in which the global refugee population has dropped, although not as sharp as in the two previous years. Over the four-year period, the global refugee population has fallen by 24 per cent. Decreases in the refugee population are often the result of refugees having access to durable solutions, in particular voluntary repatriation.

7. In regional terms, Southern Africa recorded the largest reduction in the refugee population during 2004 (-20%), followed by West Africa (-12%) (*See box below*).

UNHCR Bureau	Begin 2004	End 2004	Annual change
- Central Africa and Great Lakes	1,257,900	1,267,700	0.8%

* Excluding North Africa.
 ** Central Asia, South West Asia, North Africa and Middle East.

8. Reductions in the refugee population were also reported in Europe (-6%), the

Americas (-4%), CASWANAME (Central Asia, South-West Asia, North Africa and Middle East) (-3%). A few regions recorded increases, including Asia and Pacific (+2%), Central Africa and the Great Lakes region (+1%), and East and Horn of Africa (+0.3%).

9. Africa and CASWANAME each hosted almost 30 per cent of the global refugee population at the end of 2004. Europe hosted 25 per cent of all refugees, followed by Asia and the Pacific (9%), and the Americas (7%).

10. Most beneficiaries of UNHCR programmes are located in developing countries. Almost 90 per cent are living in countries covered by the UNHCR Bureau for CASWANAME (47%) and Africa (40%).

11. In 2004, the Islamic Republic of Iran became the main asylum country, accounting for 11 per cent of all refugees under UNHCR's mandate. The increase is mainly explained by a revision of the refugee figures in the country following a registration exercise undertaken during 2003. Following the repatriation of some 424,000 Afghan refugees, Pakistan dropped from being the main country of asylum at begin-2004 to the second largest by end-2004 (-15%). Germany stayed as the third largest asylum country of 2004. The United Republic of Tanzania and the USA (UNHCR estimate) remain as the fourth and fifth largest asylum countries despite experiencing decreases of seven per cent each during 2004. Chad saw a major increase of 78 per cent in the number of refugees during 2004 making it the ninth largest asylum country in the world (18th at begin-2004) (*see box below*)³.

12. Afghanistan continues to be by far the largest country of origin of refugees under UNHCR care. By the end of 2004, 2.1 million Afghan refugees were reported by 78 asylum countries, constituting 23 per cent of the global refugee population. Despite continued repatriation, the number of Afghan

³ UNHCR figures for Pakistan only include Afghan refugees living in camps. According to a 2005 Government census, the latest estimates available, there were an additional 1.9 million Afghans living in urban areas in Pakistan, some of whom may be refugees.

refugees dropped by only two per cent during the year.

13. Other major refugee origins experiencing important decreases during 2004 were Burundi (-9%) and Iraq (-15%). The strong fall in the Burundian refugee population reflects the repatriation of refugees from the United Republic of Tanzania (89,000) (*see box below*).

14. Significant decreases in the refugee population, often as a result of durable solutions, were also recorded for refugees from Angola (-101,000) Bosnia and Herzegovina (-62,000), Iraq (-51,000), Serbia and Montenegro (-33,000), and Liberia (-18,000).

15. However, some refugee nationalities recorded an increase in the population during 2004. The number of Sudanese refugees increased by almost 125,000 persons (+21%) due to mass outflows, mainly to Chad. The number of refugees from the Russian

Federation increased by 11,000 (+12%) while the number of Indonesian and Colombian refugees increased by more than 11,000 (+72%) and 9,000 (25%) respectively.

Refugee arrivals

16. During 2004, some 232,000 *prima facie* refugee arrivals were reported, creating new refugee emergencies in various asylum countries. The level of new outflows in 2004 was 20 per cent lower than in 2003 when 290,000 refugees fled their country *en masse*.

17. Eleven asylum countries reported the arrival of more than 1,000 *prima facie* refugees during 2004, including Chad (131,000), Burundi (20,700), Yemen (16,600), Uganda (15,500), Rwanda (14,100), the Syrian Arab Republic (12,000) and Liberia (5,500).

18. There were four countries of origin which produced more than 10,000 *prima facie* refugees in 2004: Sudan (147,000), the Democratic Republic of the Congo (38,100), Somalia (19,100), and Iraq (12,000).

Voluntary repatriation

19. Based on reports from countries of asylum (departure) and origin (arrival), it is estimated that some 1.5 million refugees repatriated voluntarily to their country of origin during 2004. In all, there were a total of 27 voluntary repatriation movements involving more than 1,000 refugees.

20. The main countries of origin to which refugees returned during 2004 included Afghanistan (940,000), Iraq (194,000), Burundi (90,000), Angola (90,000), Liberia (57,000), Sierra Leone (26,300), Somalia (18,000), Rwanda (14,100), the Democratic Republic of the Congo (13,800), and Sri Lanka (10,000).

21. The past three years saw an almost unprecedented level of voluntary repatriation, mainly due to the return of more than 3.5 million Afghans from Pakistan and the Islamic Republic of Iran. In total, more than

five million refugees were able to return home.

Resettlement

22. In 2004, almost 30,000 refugees were resettled from their previous asylum countries with UNHCR assistance. The main nationalities benefiting from UNHCR-facilitated resettlement were refugees from Liberia (5,610), Sudan (5,050), Somalia (4,870), Afghanistan (2,710), the Islamic Republic of Iran (2,190), Myanmar (1,900), Ethiopia (1,490) and the Democratic Republic of the Congo (1,290).

23. Some 68 UNHCR country offices were engaged in facilitating resettlement departures during 2004. The largest number of refugees resettled with UNHCR assistance departed from Kenya (5,640), Côte d'Ivoire (4,480), Egypt (4,110), Turkey (2,290), Thailand (1,580 (In addition some 9,100 others of concern to UNHCR were resettled with UNHCR-assistance), the Islamic Republic of Iran (830), the United Republic of Tanzania (810), Lebanon (710), Pakistan (640), the Russian Federation (590), and Ethiopia (590).

24. In 2004, 15 countries⁴ received refugees resettled under UNHCR-auspices. The main countries which resettled refugees through UNHCR were USA (63%), Australia (19%), Canada (13%), Sweden (2%), Norway (1%), Finland (1%), and Denmark (1%).

25. Immigration countries resettle refugees through UNHCR as well as bilaterally. Taking into account both, the US admitted the largest number of resettled refugees (52,900 during US Fiscal Year), followed by Australia (16,000) and Canada (10,500).

Local integration

26. In many countries, refugees have the opportunity to integrate locally because the host country has provided them with access to land or the labour market. In other countries, refugees remain confined to camps

⁴ Data for New Zealand not yet received.

where they depend on assistance from the international community. Using UNHCR beneficiary statistics, it is possible to determine the degree to which refugees depend on the international community for their survival. Industrialized countries, where assistance is generally provided by the host country, are not included in this analysis.

27. By the end of 2004, 71 per cent of the 6.5 million refugees hosted by developing countries had access to assistance provided by or through UNHCR. The proportion of refugees benefiting from international assistance varies greatly, reflecting the different opportunities provided to refugees by the host country for local integration and self-reliance. Major asylum countries where less than 75 per cent of the refugee population depends on international aid include the United Republic of Tanzania (67%), Guinea (65%), Zambia (54%), Sudan (49%), Armenia (21%), the Democratic Republic of the Congo (16%), India (7%), and China (4%).

28. Naturalization, the final and crucial step towards obtaining the full protection of the host country, is not available to refugees in all asylum countries. Moreover, the provision of citizenship to refugees is under-reported. During 2004, UNHCR was informed about significant numbers of refugees being granted citizenship by the host country in the Russian Federation (8,400), Armenia (4,150), Mexico (1,430), Kyrgyzstan (1,060), Ukraine (250), and Belize (130).

Legal status

29. It is estimated that 41 per cent of the refugee population under UNHCR care has been granted protection under the 1951 Convention and/or its 1967 Protocol. An additional 18 per cent of the refugees are recognized under the 1969 OAU Convention, whereas 12 per cent have been granted UNHCR mandate status. The legal status of more than a quarter (29%) of the refugees is unclear.

30. The majority of the world's refugees (64%) have been granted refugee status on a

group or *prima facie* basis, whereas almost one third (30%) have been granted refugee status following individual determination.

31. A large majority of refugees in Africa (86%), CASWANAME (87%) and Asia and Pacific (72%) are *prima facie* refugees, which contrasts starkly with Europe (24%) and the Americas (1%), where most refugees have been granted refugee status following individual screening. These regional differences in recognition are explained in large part by the nature of the refugee situation (mass displacement versus individual asylum-seekers) as well as by the level of economic development (individual refugee status determination is resource intensive).

Gender and age

32. About half of the world's refugees are female (49%). The proportion of female refugees varies greatly, depending on the nature of the refugee situation, the region of asylum, age, etc. For instance, in countries with mass refugee situations, the proportion of female refugees tends to be around 50 per cent. The percentage of females among asylum-seekers is significantly lower. Women are over-represented in the older age category (60 and over), reflecting the higher life expectancy of women in general.

33. Some 47 per cent of the persons of concern to UNHCR are children under the age of 18, whereas 13 per cent are under the age of five. Half of the refugees (47%) are aged between 18 and 59, whereas six per cent are 60 years old or more. Considering that most demographic data are available on refugees living in developing countries, these figures are not fully representative for all refugees, however.

34. In Africa and the CASWANAME region, where birth rates tend to be high, more than half of the refugees are under 18 years old. The proportion of refugee children is significantly lower in Asia and the Pacific (37%), Europe (23%) and the Americas (25%).

Asylum-seekers

35. During 2004, a total number of 676,000 first instance or appeal applications for asylum or refugee status were submitted to Governments or UNHCR offices in 143 countries. The number of applications during 2004 decreased by 19 per cent compared to 2003 where 830,300 applications were lodged globally. Most claims were registered in Europe (444,000), followed by the Americas (84,000), Africa (82,000), Asia and the Pacific (35,000) and CASWANAME (31,000).⁵

36. Countries receiving the largest number of new asylum claims during 2004 were France (58,500), the United Kingdom (40,200), Germany (35,600), the United States (27,900), South Africa (32,600), Canada (25,800), Austria (24,600), and Sweden (23,100).⁶

37. The largest number of new and appeal asylum claims were filed by nationals from the Russian Federation (35,200), Serbia and Montenegro (30,900), China (29,000), the Democratic Republic of the Congo (28,700), Turkey (27,000), Iraq (23,500), Somalia (22,800), Colombia (20,200), Nigeria (18,300), the Islamic Republic of Iran (15,500), India (15,300), and Pakistan (15,300).

38. In Europe, 49,500 asylum-seekers were granted individual refugee status under the 1951 Convention in 2004 and another 33,100 asylum-seekers were allowed to remain on humanitarian grounds. In the Americas, 41,400 asylum-seekers were recognized as refugees. Africa was the third largest region in terms of the number of asylum-seekers being recognized in 2004 (24,000), followed

by Asia and the Pacific (23,900) and CASWANAME (4,900).

39. The category of asylum-seekers in the total population of concern to UNHCR consists of those asylum-seekers whose claim has not yet been decided or who are otherwise registered as asylum-seekers. The number of undecided asylum cases, both at the first instance and on appeal, decreased by 16 per cent to reach 839,000 by the end of the year. If the number of asylum applications is stable or increasing, a fall in the backlog of asylum cases generally indicates that asylum procedures have become more efficient. In a situation where the number of applications is going down, the explanation of a decrease in the backlog is more ambiguous.

40. At the end of 2004, the largest number of undecided cases at the first instance and on appeal was reported by the United States (263,700), South Africa (115,200), Germany (86,200), Austria (38,300), the Netherlands (28,500), Sweden (28,000), and Canada (27,200). Many countries were able to reduce the number of undecided cases during 2004 United States (-88,200), Germany (-42,000), the Netherlands (-16,000), and the United Kingdom and Canada down some 14,000 each. Increases in the backlog were reported by South Africa (+31,200), Cyprus (+4,900), and Austria (+4,700).

Others of concern to UNHCR

41. The total number of others of concern to UNHCR (internally displaced or IDPs, returned IDPs, stateless, etc.) increased from 5.3 million at the end of 2003 to 7.6 million by the end of 2004 (+43%). This increase primarily reflects the revised Government IDP figure in Colombia as well as the newly reported IDPs of concern to UNHCR in Sudan (660,000). Furthermore, increased reporting on stateless persons has been included for various countries which make a direct comparison difficult.

42. Excluding the Colombian IDP figures, the number of IDPs of concern to UNHCR increased by 489,000 persons (+10%) during

2004. With the exception of Colombia (+240,000) and Sudan which reported IDPs for the first time during 2004, all other IDP situations of concern to UNHCR decreased in the number of persons affected. This includes IDPs in Sri Lanka (-33,700), the Russian Federation (-33,400), Liberia (-33,100), Afghanistan (-24,700), Georgia (-23,100), and Bosnia and Herzegovina (-17,000). The IDP situation in Burundi was no longer reported by the UNHCR office.

43. A number of IDP situations, however, appear to be protracted with few durable solutions being achieved in 2004. This includes the situations in Colombia (2 millions)⁷, Azerbaijan (579,000), and Serbia and Montenegro (248,000).

Stateless Persons

44. In addition to refugees, UNHCR has been tasked by the United Nations General Assembly through various resolutions to contribute to the reduction of statelessness and further protect stateless persons. In particular, UNHCR has been asked by the United Nations General Assembly to regularly inform the international community on the magnitude of the problem of statelessness⁸.

45. In March 2004, UNHCR published an analysis of the replies made by 74 States to a questionnaire⁹ on the steps taken by States to reduce statelessness and to meet the protection needs of stateless persons. One finding of the survey is that many States referred to the difficulty of identifying stateless persons. As of 2004, UNHCR is further reinforcing its collection of statistics relating to stateless persons by devoting a special table to these populations (*Table 14a*). Although UNHCR is not in a position to provide reliable statistics on the total number of stateless persons, it has indicated

countries with confirmed individuals and groups of stateless persons but where the numbers are not available. Stateless persons reported in the category Others of Concern to UNHCR only includes persons who are not already included in the other categories of concern to UNHCR (e.g. refugees, asylum-seekers, IDPs).

46. UNHCR is aware of 42 countries with stateless persons in this category by the end of 2004. For the 30 countries where data was available as per end-2004, the total number of stateless persons was estimated to be 1.5 million.

⁷ Government estimate from the Social Solidarity Network. According to NGOs the figure might be up to 3.3 million IDPs.

Notes

The data are generally provided by Governments, based on their own definitions and methods of data collection.

A dash (-) indicates that the value is zero, not available or not applicable.

¹ UNHCR region and country or territory of asylum or residence. In the absence of Government figures, UNHCR has estimated the refugee population in many industrialized countries, based on recent refugee arrivals and recognition of asylum-seekers. For Canada, USA, Australia and New Zealand, estimates are based on arrivals/recognition during the past five years, whereas for most European countries a 10-year period has been applied. These periods reflect the different naturalization rates for refugees.

² Persons recognized as refugees under the 1951 UN Convention/1967 Protocol, the 1969 OAU Convention, in accordance with the UNHCR Statute, persons granted a humanitarian status and those granted temporary protection.

³ Persons whose application for asylum or refugee status is pending at any stage in the procedure or who are otherwise registered as asylum-seekers.

⁴ Refugees who have returned to their place of origin during the year. Source: Country of origin and asylum.

⁵ Persons who are displaced within their country and to whom UNHCR extends protection and/or assistance, generally pursuant to a special request by a competent organ of the United Nations.

⁶ IDPs of concern to UNHCR who have returned to their place of origin during the year.

⁷ Persons of concern to UNHCR not included in the previous columns. See Table 14 and 14a for further details.

* Refugee population estimated by UNHCR. The figure only includes Afghans in urban areas. The figure is currently being reviewed by UNHCR of the 2005 census.

** 2003 data for Lithuania (refugees) and Tajikistan (2004 data not yet available).

Table 2. Refugee population and changes by country of asylum, 2004

Source: 2004 ASR. Data are provisional and subject to change. Date of query: 6 June 2005

For many industrialized countries, UNHCR has estimated the refugee population (see Table 1, footnote 1). *Voluntary repatriation: best estimate, based on country of asylum and origin reports.

The columns Other increases and Other decreases include population changes resulting from administrative corrections, adjustments as a result of registration, new estimates as well as births and deaths.

In some cases, the population end-year does not equal the population begin-year plus increases and minus decreases. This discrepancy is due to the fact that the voluntary repatriation figures include estimates from countries of return. In addition, the full details of the changes in the refugee population in industrialized countries are often not known.

Table 2. Refugee population and changes by country of asylum, 2004

Source: 2004 ASR. Data are provisional and subject to change. Date of query: 6 June 2005

For many industrialized countries, UNHCR has estimated the refugee population (see Table 1, footnote 1). *Voluntary repatriation: best estimate, based on country of asylum and origin reports.

The columns Other increases and Other decreases include population changes resulting from administrative corrections, adjustments as a result of registration, new estimates as well as births and deaths.

In some cases, the population end-year does not equal the population begin-year plus increases and minus decreases. This discrepancy is due to the fact that the voluntary repatriation figures include estimates from countries of return. In addition, the full details of the changes in the refugee population in industrialized countries are often not known.

Table 3. Refugee population and changes by origin, 2004

Source: 2004 ASR. Data are provisional and subject to change. Date of query: 6 June 2005

For many industrialized countries, UNHCR has estimated the refugee population (see Table 1, footnote 1). *Voluntary repatriation: best estimate, based on country of asylum and origin reports.

The columns Other increases and Other decreases include population changes resulting from administrative corrections, adjustments as a result of registration, new estimates as well as births and deaths.

In some cases, the population end-year does not equal the population begin-year plus increases and minus decreases. This discrepancy is due to the fact that the voluntary repatriation figures include estimates from countries of return. In addition, the full details of the changes in the refugee population in industrialized countries are often not known.

Table 4. Refugee population and changes by major origin and country of asylum, 2004

Source: 2004 ASR. Total refugee population end-year 5,000 or more. Data are provisional and subject to change. Date of query: 6 June 2005.

For many industrialized countries, UNHCR has estimated the refugee population (see Table 1, footnote 1). *Voluntary repatriation: best estimate, based on country of asylum and origin reports.

The columns Other increases and Other decreases include population changes resulting from administrative corrections, adjustments as a result of registration, new estimates as well as births and deaths.

In some cases, the population end-year does not equal the population begin-year plus increases and minus decreases. This discrepancy is due to the fact that the voluntary repatriation figures include estimates from countries of return. In addition, the full details of the changes in the refugee population in industrialized countries are often not known.

Table 4. Refugee population and changes by major origin and country of asylum, 2004

Source: 2004 ASR. Total refugee population end-year 5,000 or more. Data are provisional and subject to change. Date of query: 6 June 2005.

For many industrialized countries, UNHCR has estimated the refugee population (see Table 1, footnote 1). *Voluntary repatriation: best estimate, based on country of asylum and origin reports.

The columns Other increases and Other decreases include population changes resulting from administrative corrections, adjustments as a result of registration, new estimates as well as births and deaths.

In some cases, the population end-year does not equal the population begin-year plus increases and minus decreases. This discrepancy is due to the fact that the voluntary repatriation figures include estimates from countries of return. In addition, the full details of the changes in the refugee population in industrialized countries are often not known.

Important note:

In countries with more than one level in the procedure (first instance, appeal, etc.), the figures for both procedures have been added up. As a result, appeal cases have been counted more than once (once in first instance and once in appeal). These data allow to monitor the number of decisions taken, but they are not indicative of the final outcome of the procedure. For information on recognition rates see Table 6.

Table 5. Asylum applications and refugee status determination by country of asylum, 2004

Source: 2004 ASR. Data are provisional and subject to change. Date of query: 6 June 2004

See notes at end of table.

Important note:

In countries with more than one level in the procedure (first instance, appeal, etc.), the figures for both procedures have been added up. As a result, appeal cases have been counted more than once (once in first instance and once in appeal). These data allow to monitor the number of decisions taken, but they are not indicative of the final outcome of the procedure. For information on recognition rates see Table 6.

Table 7. Asylum applications and refugee status determination by origin, 2004

Source: 2004 ASR. Data are provisional and subject to change. Date of query: 6 June 2005

See notes at end of table.

Important note:

In countries with more than one level in the procedure (first instance, appeal, etc.), the figures for both procedures have been added up. As a result, appeal cases have been counted more than once (once in first instance and once in appeal). These data allow to monitor the number of decisions taken, but they are not indicative of the final outcome of the procedure. For instance, recognition rates for nationalities which tend to appeal a rejection are underestimated.

Table 10. Demographic composition of populations of concern to UNHCR, end-2004

Source: 2004 ASR. Data are provisional and subject to change. Date of query: 6 June 2005

* Indicates the proportion of the population of concern in the country for which the demographic data are available. If the coverage is low (below 10-20 per cent), the percentages may not be representative for total population of concern in the country.

Important notes:

The population for which demographic data is available does not necessarily equal the total population of concern in the country. Countries with no demographic information are not included.

Table 10. Demographic composition of populations of concern to UNHCR, end-2004

Source: 2004 ASR. Data are provisional and subject to change. Date of query: 6 June 2005

* Indicates the proportion of the population of concern in the country for which the demographic data are available. If the coverage is low (below 10-20 per cent), the percentages may not be representative for total population of concern in the country.

Important notes:

The population for which demographic data is available does not necessarily equal the total population of concern in the country. Countries with no demographic information are not included.

* The population beginning 2004 includes new groups of stateless persons which were not included in the statistics end-2003; therefore, the total does not equal the total from UNHCR statistics end-2003.

¹ This definition refers mainly to *de jure* stateless persons but also includes *de facto* stateless persons as well as persons who have difficulties establishing their nationality.

² All persons recorded as stateless have permanent residence and enjoy more rights than foreseen in the 1954 Convention relating to the Status of Stateless Persons.

³ Non Citizens of Latvia have permanent residence and rights on the basis of the *Law on the Status of former USSR citizens who are not citizens of Latvia or any other State* of 25th April 1995. The Latvian Government does not consider this category of persons as stateless persons. Source: Latvian Naturalization Board www.np.gov.lv.

⁴ This figure corresponds to Meskhetians in Krasnodar who are *de facto* stateless. Additional numbers of former Soviet Union citizens not originating from the Federation of Russia who cannot be quantified may also still face risks of statelessness.

⁵ Figures are based on estimates from Amnesty International and Human Rights Watch.

INTRODUCTORY NOTE
by the Office of the
United Nations High Commissioner for Refugees
(UNHCR)

PURSUANT TO A DECISION OF THE General Assembly⁽¹⁾, a United Nations Conference of Plenipotentiaries met at Geneva in 1951 to draft a Convention regulating the legal status of refugees. As a result of their deliberations, the United Nations Convention relating to the Status of Refugees was adopted on 28 July 1951. Following the deposit of the sixth instrument of ratification it entered into force on 22 April 1954.

The Convention consolidates previous international instruments relating to refugees and provides the most comprehensive codification of the rights of refugees yet attempted on the international level. It lays down basic minimum standards for the treatment of refugees, without prejudice to the granting by States of more favorable treatment. The Convention is to be applied without discrimination as to race, religion or country of origin, and contains various safeguards against the expulsion of refugees. It also makes provision for their documentation, including a refugee travel document in passport form. Most States parties to the Convention issue this document. It has become as widely accepted as was the former “Nansen passport.”

Certain provisions of the Convention are considered so fundamental that no reservations may be made to them. These include the definition of the term “refugee,” and the so-called principle of *non-refoulement*, i.e. that no Contracting State shall expel or return (“*refouler*”) a refugee, against his or her will, in any manner whatsoever, to a territory where he or she fears persecution.

The Convention does not apply to those refugees who are the concern of United Nations agencies other than UNHCR, such as refugees from Pales-

(1) United Nations General Assembly resolution 429 (V) of 14 December 1950. For the text of this resolution, see official records of the General Assembly Fifth Session, Supplement No. 20 [A/1775], p. 48.

tine who receive protection or assistance from the United Nations Relief and Works Agency for Palestine Refugees in the Near East (UNRWA), nor to those refugees who have a status equivalent to nationals in their country of refuge.

While earlier international instruments only applied to specific groups of refugees, the definition of the term “refugee” contained in Article 1 of the 1951 Convention is couched in general terms. But the scope of the Convention is limited to persons who became refugees as a result of events occurring before 1 January 1951.⁽²⁾

With the passage of time and the emergence of new refugee situations, the need was increasingly felt to make the provisions of the Convention applicable to such new refugees. As a result, a Protocol relating to the Status of Refugees was prepared and submitted to the United Nations General Assembly in 1966. In Resolution 2198 (XXI) of 16 December 1966, the Assembly took note of the Protocol and requested the Secretary-General to submit the text thereof to States, to enable them to accede. The authentic text of the Protocol was signed by the President of the General Assembly and the Secretary-General in New York on 31 January 1967, and transmitted to Governments. It entered into force on 4 October 1967, upon the deposit of the sixth instrument of accession.

By accession to the Protocol, States undertake to apply the substantive provisions of the 1951 Convention to all refugees covered by the definition of the latter, but without limitation of date. Although related to the Convention in this way, the Protocol is an independent instrument, accession to which is not limited to States parties to the Convention.

The Convention and the Protocol are the principal international instruments established for the protection of refugees and their basic character has been widely recognized internationally. The General Assembly has frequently called upon States to become parties to these instruments. Accession has also been recommended by various regional organizations, such as the Council of Europe, the African Union, and the Organization of American

(2) The Convention enabled States when becoming parties to introduce a declaration according to which the words “events occurring before 1 January 1951” are understood to mean “events occurring in Europe” prior to that date. This geographical limitation has been maintained by a very limited number of states, and with the adoption of the 1967 Protocol, has lost much of its significance.

States. As of 1 August 2007, there were 147 States Parties to one or both of these instruments.

By its statute, the Office of the High Commissioner is entrusted, *inter alia*, with the task of promoting international instruments for the protection of refugees, and supervising their application. Under the Convention and Protocol, contracting States undertake to cooperate with the Office of UNHCR in the exercise of its functions and, in particular, to facilitate its specific duty of supervising the application of the provisions of these instruments.

In view of the increasing recognition of the fundamental significance of the Convention and the Protocol for the protection of refugees and for the establishment of minimum standards for their treatment, it is important that their provisions should be known as widely as possible, both by refugees and by all those concerned with refugee problems.

Information on accessions to the Convention and to the Protocol, as well as other relevant details, may be obtained from UNHCR, or from the UNHCR website at www.unhcr.org.

FINAL ACT

of the United Nations Conference of Plenipotentiaries on the Status of Refugees and Stateless Persons

I. Representatives of Non-Governmental Organizations which have been granted consultative status by the Economic and Social Council as well as those entered by the Secretary-General on the Register referred to in Resolution 288 B (X) of the Economic and Social Council, paragraph 17, had under the rules of procedure adopted by the Conference the right to submit written or oral statements to the Conference.

The Conference elected Mr. Knud Larsen, of Denmark, as President, and Mr. A. Herment, of Belgium, and Mr. Talat Miras, of Turkey, as Vice-Presidents.

At its second meeting, the Conference, acting on a proposal of the representative of Egypt, unanimously decided to address an invitation to the Holy See to designate a plenipotentiary representative to participate in its work. A representative of the Holy See took his place at the Conference on 10 July 1951.

The Conference adopted as its agenda the Provisional Agenda drawn up by the Secretary-General (A/CONF.2/2/Rev.1). It also adopted the Provisional Rules of Procedure drawn up by the Secretary-General, with the addition of a provision which authorized a representative of the Council of Europe to be present at the Conference without the right to vote and to submit proposals (A/CONF.2/3/Rev.1).

In accordance with the Rules of Procedure of the Conference, the President and Vice-Presidents examined the credentials of representatives and on 17 July 1951 reported to the Conference the results of such examination, the Conference adopting the report.

The Conference used as the basis of its discussions the draft Convention relating to the Status of Refugees and the draft Protocol relating to the Status of Stateless Persons prepared by the *ad hoc* Committee on Refugees and Stateless Persons at its second session held in Geneva from 14 to 25 August 1950, with the exception of the preamble and Article 1 (Definition of the term

“refugee”) of the draft Convention. The text of the preamble before the Conference was that which was adopted by the Economic and Social Council on 11 August 1950 in Resolution 319 B II (XI). The text of Article 1 before the Conference was that recommended by the General Assembly on 14 December 1950 and contained in the Annex to Resolution 429 (V). The latter was a modification of the text as it had been adopted by the Economic and Social Council in Resolution 319 B II (XI).

The Conference adopted the Convention relating to the Status of Refugees in two readings. Prior to its second reading it established a Style Committee composed of the President and the representatives of Belgium, France, Israel, Italy, the United Kingdom of Great Britain and Northern Ireland and the United States of America, together with the High Commissioner for Refugees, which elected as its Chairman Mr. G. Warren, of the United States of America. The Style Committee re-drafted the text which had been adopted by the Conference on first reading, particularly from the point of view of language and of concordance between the English and French texts.

The Convention was adopted on 25 July by 24 votes to none with no abstentions and opened for signature at the European Office of the United Nations from 28 July to 31 August 1951. It will be re-opened for signature at the permanent headquarters of the United Nations in New York from 17 September 1951 to 31 December 1952.

The English and French texts of the Convention, which are equally authentic, are appended to this Final Act.

II. The Conference decided, by 17 votes to 3 with 3 abstentions, that the titles of the chapters and of the articles of the Convention are included for practical purposes and do not constitute an element of interpretation.

III. With respect to the draft Protocol relating to the Status of Stateless Persons, the Conference adopted the following resolution:

THE CONFERENCE,

HAVING CONSIDERED the draft Protocol relating to the Status of Stateless Persons,

CONSIDERING that the subject still requires more detailed study,

DECIDES not to take a decision on the subject at the present Conference and

refers the draft Protocol back to the appropriate organs of the United Nations for further study.

IV. The Conference adopted unanimously the following recommendations:

A

(Facilitation of refugee travels)⁽¹⁾

THE CONFERENCE,

CONSIDERING that the issue and recognition of travel documents is necessary to facilitate the movement of refugees, and in particular their resettlement,

URGES Governments which are parties to the Inter-Governmental Agreement on Refugee Travel Documents signed in London on 15 October 1946, or which recognize travel documents issued in accordance with the Agreement, to continue to issue or to recognize such travel documents, and to extend the issue of such documents to refugees as defined in Article I of the Convention relating to the Status of Refugees or to recognize the travel documents so issued to such persons, until they shall have undertaken obligations under Article 28 of the said Convention.

B

(Principle of unity of the family)⁽¹⁾

THE CONFERENCE,

CONSIDERING that the unity of the family, the natural and fundamental group unit of society, is an essential right of the refugee, and that such unity is constantly threatened, and

NOTING with satisfaction that, according to the official commentary of the *ad hoc* Committee on Statelessness and Related Problems (E/1618, p. 40), the rights granted to a refugee are extended to members of his family,

RECOMMENDS Governments to take the necessary measures for the protection of the refugee's family especially with a view to:

(1) Headline added.

- (1) Ensuring that the unity of the refugee's family is maintained particularly in cases where the head of the family has fulfilled the necessary conditions for admission to a particular country,
- (2) The protection of refugees who are minors, in particular unaccompanied children and girls, with special reference to guardianship and adoption.

C

(Welfare services)⁽¹⁾

THE CONFERENCE,

CONSIDERING that, in the moral, legal and material spheres, refugees need the help of suitable welfare services, especially that of appropriate non-governmental organizations,

RECOMMENDS Governments and inter-governmental bodies to facilitate, encourage and sustain the efforts of properly qualified organizations.

D

(International co-operation in the field of asylum and resettlement)⁽¹⁾

THE CONFERENCE,

CONSIDERING that many persons still leave their country of origin for reasons of persecution and are entitled to special protection on account of their position,

RECOMMENDS that Governments continue to receive refugees in their territories and that they act in concert in a true spirit of international co-operation in order that these refugees may find asylum and the possibility of resettlement.

E

(Extension of treatment provided by the Convention)⁽¹⁾

THE CONFERENCE,

EXPRESSES the hope that the Convention relating to the Status of Refugees will have value as an example exceeding its contractual scope and that

(1) Headline added.

all nations will be guided by it in granting so far as possible to persons in their territory as refugees and who would not be covered by the terms of the Convention, the treatment for which it provides.

IN WITNESS WHEREOF the President, Vice-Presidents and the Executive Secretary of the Conference have signed this Final Act.

DONE at Geneva this twenty-eighth day of July one thousand nine hundred and fifty-one in a single copy in the English and French languages, each text being equally authentic. Translations of this Final Act into Chinese, Russian and Spanish will be prepared by the Secretary-General of the United Nations, who will, on request, send copies thereof to each of the Governments invited to attend the Conference.

CONVENTION

Relating to the Status of Refugees

Preamble

THE HIGH CONTRACTING PARTIES,

CONSIDERING that the Charter of the United Nations and the Universal Declaration of Human Rights approved on 10 December 1948 by the General Assembly have affirmed the principle that human beings shall enjoy fundamental rights and freedoms without discrimination,

CONSIDERING that the United Nations has, on various occasions, manifested its profound concern for refugees and endeavoured to assure refugees the widest possible exercise of these fundamental rights and freedoms,

CONSIDERING that it is desirable to revise and consolidate previous international agreements relating to the status of refugees and to extend the scope of and protection accorded by such instruments by means of a new agreement,

CONSIDERING that the grant of asylum may place unduly heavy burdens on certain countries, and that a satisfactory solution of a problem of which the United Nations has recognized the international scope and nature cannot therefore be achieved without international co-operation,

EXPRESSING the wish that all States, recognizing the social and humanitarian nature of the problem of refugees, will do everything within their power to prevent this problem from becoming a cause of tension between States,

NOTING that the United Nations High Commissioner for Refugees is charged with the task of supervising international conventions providing for the protection of refugees, and recognizing that the effective co-ordination of measures taken to deal with this problem will depend upon the co-operation of States with the High Commissioner,

HAVE AGREED as follows:

Decisions of non-eligibility taken by the International Refugee Organization during the period of its activities shall not prevent the status of refugee being accorded to persons who fulfil the conditions of paragraph 2 of this section;

D. This Convention shall not apply to persons who are at present receiving from organs or agencies of the United Nations other than the United Nations High Commissioner for Refugees protection or assistance.

When such protection or assistance has ceased for any reason, without the position of such persons being definitively settled in accordance with the relevant resolutions adopted by the General Assembly of the United Nations, these persons shall *ipso facto* be entitled to the benefits of this Convention.

E. This Convention shall not apply to a person who is recognized by the competent authorities of the country in which he has taken residence as having the rights and obligations which are attached to the possession of the nationality of that country.

F. The provisions of this Convention shall not apply to any person with respect to whom there are serious reasons for considering that:

- (a) he has committed a crime against peace, a war crime, or a crime against humanity, as defined in the international instruments drawn up to make provision in respect of such crimes;
