Nama : Aditya Sulaksono
Program Studi : Magister Perencanaan dan Kebijakan Publik
Judul : Peranan Irigasi Dalam Perekonomian Indonesia (Analisis Input-Output)

Tesis ini membahas peranan sektor irigasi dalam perekonomian Indonesia dengan menggunakan metode analisis input-output. Hasil penelitian menyimpulkan bahwa sektor irigasi memiliki peranan yang penting terhadap perekonomian Indonesia. Berdasarkan simulasi kebijakan penutupan sektor irigasi dan perubahan investasi, sektor-sektor hulu dan hilir sektor irigasi mengalami penurunan indeks keterkaitan ke belakang dan indeks keterkaitan ke depan serta penurunan output, nilai tambah bruto dan tenaga kerja.

Kata kunci :
Irigasi, analisis input-output,

Title : The Role of Irrigation In Indonesia's Economy (An Input-Output Analysis)

This thesis discusses the role of irrigation sector in the economy using input-output analysis. Results of research concluded that irrigation sector has an important role to the economy of Indonesia. Based on the simulation of the closure policy and changes in irrigation sector investment, the upstream and downstream sectors of irrigation sector has decreased the backward and forward linkage index as well as a decrease in output, value added and gross labor.

Keywords:
Irrigation, input-output analysis,
