

Pengendalian pencemaran sumber air dengan ekoteknologi (Wetland buatan)

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=121088&lokasi=lokal>

Abstrak

A water quality evaluation was done on 30 (thirty) rivers of Indonesia. Analysis was based on measurement results collected by the ministry for the environment and the Research Centre for Water Resources from 2000 up to 2005, whereas evaluation was implemented according to the STORET method and Government Regulation No. 82/ 2001 on Water quality management and water pollution control....
