

Architectural design / Jane Anderson

Anderson, Jane

Deskripsi Dokumen: <http://lib.ui.ac.id/bo/uibo/detail.jsp?id=20361162&lokasi=lokal>

Abstrak

Basics Architecture: Architectural Design explains the mysterious and little-discussed process of designing architectural projects. Through discussion and case studies, it allows to develop a personal approach to architectural design, based on their own values, skills and preoccupations.

The architectural design process is as diverse as the people who practice it; every architect follows their own individual design process. Basics Architecture: Architectural Design introduces a number of different processes through examples and case studies. This allows to identify with certain methods that they could develop to respond to their own work, and enables them to develop their own unique approach.
