[ABSTRAK

Fungsi manajemen penting untuk mewujudkan pelayanan keperawatan yang bermutu. Penelitian cross sectional pada 77 perawat di IRNA I RSUP Dr. Sardjito ini bertujuan mengidentifikasi hubungan fungsi manajemen kepala ruang dan karakteristik perawat dengan penerapan keselamatan pasien dan perawat. Hasil membuktikan lima fungsi manajemen kepala ruang berhubungan dengan penerapan keselamatan pasien ($p=0,000-0,032$; $\alpha=0,05$), dengan faktor paling berpengaruh adalah fungsi pengendalian. Fungsi perencanaan, pengaturan staf, pengarahan, dan pengendalian berhubungan dengan penerapan keselamatan perawat ($p=0,005-0,032$; $\alpha=0,05$), dengan faktor paling berpengaruh adalah fungsi pengarahan. Pelatihan berhubungan dengan penerapan keselamatan pasien ($p=0,048$; $\alpha=0,05$). Kepala ruang perlu selalu meningkatkan fungsi pengendalian dan pengarahan
