Rural autonomy as fundamental phenomenon in local autonomy era, basically is an answer for the confrontation that happened on 1948, it's all about 'the level of autonomy' in Indonesia; will it use "two levels? of autonomy system or it will be democratize into "three level" autonomy system; added by rural district as 'the third level' of local autonomy. Later, this confrontation got down by cooptation of government power, that gave effect to de-concentration of government politic to the rural district, which posses local people need in secondary side. This article tries to agitate the presence of autonomitation of rural in Bali. Otherwise. this article means to erase the perception of the dualism of rural's mean and pattern in Bali, that are between pakraman rural (desa pakraman) and official rural (desa dinas/kelurahan).
