Abstrak

[The book presents the works of literature review on the neuropsychological rehabilitation made as preparatory work for the Consensus Conference on Rehabilitation neuropsychological which held in Siena in February 2010 under the auspices of a number of associations and scientific and professional society. The approach used so common in all the revisions that of "evidence-based medicine" that allows you to get to the recommendations on the effectiveness of various rehabilitation treatments with a solid anchor in the international scientific literature. , The book presents the works of literature review on the neuropsychological rehabilitation made as preparatory work for the Consensus Conference on Rehabilitation neuropsychological which held in Siena in February 2010 under the auspices of a number of associations and scientific and professional society.
