

Evolutionary biology: mechanisms and trends

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20417736&lokasi=lokal>

Abstrak

The annual evolutionary biology meetings in Marseilles serve to gather leading evolutionary biologists and other scientists using evolutionary biology concepts, e.g. for medical research. The aims of these meetings are to promote the exchange of ideas and to encourage interdisciplinary collaborations.

This book collects 19 selected contributions presented at the 15th meeting, which took place in September 2011. It starts with a description of the life and work of J.B.S. Haldane, a remarkable evolutionary biologist of the 20th century. The remaining chapters are grouped under the following three themes, new concepts in evolutionary biology, macroevolution : mechanisms and trends, genome evolution.
