

Manfredo P. do Carmo – Selected papers

Tenenblat, Ketj, editor

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20420483&lokasi=lokal>

Abstrak

This volume of selected academic papers demonstrates the significance of the contribution to mathematics made by Manfredo P. do Carmo. The area of differential geometry is the main focus of this selection, though it also contains do Carmo's own commentaries on his life as a scientist as well as assessment of the impact of his researches and a complete list of his publications. Aspects covered in the featured papers include relations between curvature and topology, convexity and rigidity, minimal surfaces, and conformal immersions, among others. Offering more than just a retrospective focus, the volume deals with subjects of current interest to researchers, including a paper co-authored with Frank Warner on the convexity of hypersurfaces in space forms. It also presents the basic stability results for minimal surfaces in the Euclidean space obtained by the author and his collaborators.
