Abstrak

Penelitian ini menghasilkan rancangan alat bantu berupa Sistem Pakar Kombinasi Analytical Hierarchy Process (AHP) Berbasis Web dalam Pemilihan Alat Kontrasepsi didasarkan tidak ditemukannya satu metode kontrasepsi yang aman dan efektif bagi semua klien kecuali telah disesuaikan dengan karakteristik individu. Desain penelitian ini adalah kasus kontrol. Keputusan yang dihasilkan konsultasikb.com hanya berupa saran-saran yang harus dikonsultasikan kepada Tenaga Kesehatan.

This research resulted in a tool design called Web Based Expert System Combined with Analytical Hierarchy Process (AHP) in Contraceptives Selection by reason of not found a contraception method which is safe and effective for all clients unless they have been adapted to the individual characteristics. This study was a case control. A decision produced by konsultasikb.com is kind of suggestions that still have to be consulted further to the Health Scientist.
