

Biomimetics in materials science : self-healing, self-lubricating, and self-cleaning materials

Nosonovsky, Michael, author

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20425009&lokasi=lokal>

Abstrak

This book provides a comprehensive theoretical and practical review of biomimetic materials with self-healing, self-lubricating and self-cleaning properties. These three topics are closely related and constitute rapidly developing areas of study. The field of self-healing materials requires a new conceptual understanding of this biomimetic technology, which is in contrast to traditional engineering processes such as wear and fatigue. A new theoretical framework for these processes is presented based on the concept of multi-scale structure of entropy and non-equilibrium thermodynamics, together with a detailed review of the available technology. The latter includes experimental, modeling, and simulation results obtained on self-healing/lubricating/cleaning materials since their emergence in the past decade.
