

Thermal spray 2003: advancing the science and applying the technology: proceedings of the 2003 International Thermal Spray Conference, 5-8 May, 2003, Orlando, Florida, USA

Deskripsi Lengkap: <https://lib.ui.ac.id/detail?id=20442688&lokasi=lokal>

Abstrak

Contents :

- Numerical and Microstructural Investigations of the Bonding Mechanisms in Cold Spraying
- High Strain Rate Deformation Phenomena in Explosive Powder Compaction and Cold Gas Spraying
- Optimizing the Cold Spray Process
- Modeling of Particle-Substrate Adhesive Interaction Under the Cold Spray Process
- A Systematic Approach to Material Eligibility for the Cold Spray Process
- Particle-Substrate Interactions in Cold Gas Dynamic Spraying
- Evaluation Of Coatings Produced Via Kinetic And Cold Spray Processes
- Potential Applications of Cold-Spray Technology in Automotive Manufacturing
- Development of Cold Gas Sprayed Coatings
- Cold Spray Copper Application for Upper Stage Rocket Engine Design
- Kinetic Spray of Aluminum Metal Matrix Composites For Thermal Management Applications
- Effect of Spray Angle on Deposition Characteristics in Cold Spraying
- Cold Spraying – Equipment and Application Trends
- Automated Cold Spray System: Description of Equipment and Performance Data
- Helium Recovery: Design Considerations for Cold Spray Systems
- Cold Spray Technology: An Industrial Perspective
- Production Coating Cost Comparison
- Thermal Spray Solutions For Diesel Engine Piston Rings
- Low-Cost High-Performance Coatings Produced by Internal Plasma Spraying for the Production of High Efficiency Engines
- Development of Thermal Spray for Automotive Cylinder Bores
- 316L – an Alternative to NiCr Bondcoats for Cr₂O₃-Coatings on Anilox Rolls
- Plasma-Sprayed Ceramic Coatings for Molten Metal Environments
- Influence of Powder Size in Aluminum Oxide Coatings for Use in the Semiconductor Industry
- Intermediate Temperature SOFC Based on Fully Integrated Plasma Sprayed Components
- Investigation of the Photocatalytic Efficiencies of Plasma Sprayed TiO₂-Fe₃O₄ Coatings

- Protection of Titanium Alloy Surfaces by Thermal Spraying and Laser Treatment
- Fabrication of TiO₂ Photocatalytic Coatings on PET by Thermal Spraying
- Photocatalytic Decomposition of Ammonia by Thermal Sprayed TiO₂ Coatings
- Optimization of Axial Injection Conditions in a Supersonic Induction Plasma Torch: Application to SOFCs
- Methodology for Meeting Standards and Environmental Requirements in Thermal Spraying Hardfacing and Sand Blasting
- Erosion Resistance of Arc Spray Composite Coatings at High Temperature on Boiler Tubes of Pulverized Coal Fired Power Station
- Assessing the Feasibility of Using Diamond as a Reinforced Phase in Metal Matrix Composite Coatings
- New Carbide Based Materials for HVOF Spraying
- Advanced Oxide Ceramic Coatings for Applications Demanding High Wear Resistance
- Development and Application of WC-Cr₃C₂-Ni Coating with High Impact Resistance
- Preparation and Characterization of Powders and Coatings Containing Solid Lubricants
- Properties of Plasma and D-Gun Sprayed Metal-Matrix-Composite (MMC) Coatings Based on Ceramic Hard Particle Reinforced Fe-, Ni-aluminide Matrix
- Ceramic Coating of Alloy 625 using Controlled Atmosphere Plasma Spraying for Sea Water Corrosion Protection
- The Influence of Matrix Phase Viscosity on the Plasma-Spray Deposition Of Silicon-Nitride Composite Coatings
- Influence of Rare Earth Elements on the Corrosion Resistance of Fe-Cr-Ni Thermal Sprayed Coatings
- Process Temperature-Hardness-Wear Relationships for HVOF-Sprayed Nanostructured and Conventional Cermet Coatings
- A Parametric Study of an HVOF Process for the Deposition of Nanostructured WC-Co Coatings
- Abrasion and Sliding Wear of Nanostructured Ceramic Coatings
- Fatigue and Fracture Resistance of Nanostructured Composite System: Chrome Carbide – Hard Oxide Aluminum – Aluminum
- Abrasion Wear Behaviour of Plasma and HVOF Sprayed Al₂O₃-SiC Nanocomposite Coatings
- Effect of Powder Composition on the Microstructure and Wear Properties of Sprayed Cast Iron Coatings
- Influence of Thermal Spray Process on the Corrosion Behavior of High-Density - Stainless Steel Coatings in Simulated Marine Environment
- A New Spray Coating Process for Manufacture of Stainless Steel Clad Construction Steel with Resistance to Corrosion by De-icing Salts & Seawater
- HVOF Reactive Spraying of Mechanically Alloyed Ni-Ti-C Powders

- Marine Exposure Tests of Thermal Sprayed Coatings in Japan
- Development of Dense Corrosion Resistant Coatings By an Improved HVOF Spraying Process
- Protection of Steel Components Against Marine Corrosion by Thermally Sprayed Anodic Coatings
- Development and Implementation of HVOF WC/Co/Cr Coating as Alternative to Electrolytic Hard Chrome Plate in Landing Gear Applications
