Abstrak

Kehadiran CJK FTA sebagai satu-satunya institusi formal di kawasan Asia Timur Laut menjadikan pembahasan akademik mengenai regionalisme ekonomi di Asia Timur Laut terpusat pada perkembangan institusi tersebut. TKA ini bertujuan untuk memetakan persebaran pandangan mengenai dinamika perkembangan CJK FTA melalui tiga klasifikasi taksonomi sebagai metode pengelompokan literatur yakni (1) pengaruh aktor ekstra-regional; (2) pengaruh relasi CJK; (3) pengaruh aktor domestik. Tema pertama mencakup perdebatan akademisi mengenai peran AS dan ASEAN terhadap rivalitas CJK di kawasan Asia-Pasifik khususnya pengaruh TPP dan RCEP terhadap agenda CJK FTA. Tema kedua berfokus pada perdebatan untung-rugi CJK FTA melalui pembahasan karakter FTA ketiga negara, hubungan perdagangan intra-kawasan, hambatan sektor tarif dan hambatan aspek keamanan serta sentimen historis dalam proses negosiasi. Tema ketiga membahas perdebatan akademisi mengenai peran institusi pemerintah dan kelompok kepentingan bisnis dalam agenda setting dan sosialisasi CJK FTA. Selain itu, tulisan ini mengidentifikasi empat perspektif teoritis dominan dan pengaruh pemikiran dalam perkembangan CJK FTA yakni realisme, liberalisme, neo-merkantilisme dan realisme neo-klasik. Berdasarkan hasil tinjauan pustaka ini, ditemukan adanya eskplorasi strategi kebijakan untuk mempercepat CJK FTA dan perlunya ragam penelitian yang mengkaji dampak regionalisme ekonomi CJK FTA terhadap kawasan diluar Asia Timur Laut.

.....The presence of the CJK FTA as the only formal institution in Northeast Asia has centred the academic discussion about economic regionalism on the development of this institution. This paper seeks to organize academics perspective regarding the development of CJK FTA based on taxonomic classification method, resulting three main concerns from scholars: (1) the influence of extra-regional actors; (2) relations between CJK; (3) influence of domestic actors. The first theme included academic debates about the role US and ASEAN in the rivalry of CJK in the Asia-Pacific region, particularly by the influence of TPP and RCEP upon CJK FTA agenda. The second theme focuses on CJK FTA profit and loss through comparison of FTA character, intra-regional trade relations, tariff sector, security and historical sentiments in the negotiation process. The third theme focuses on the role of government institutions and the business sector in agenda setting and socialization of CJK FTA. Based on literature review, this paper identifies four dominant theoretical perspectives namely realism, liberalism, neo-mercantilism and neo-classical realism which are used to explain the economic regionalism in Northeast Asia. Furthermore, this paper showed an exploration of policy strategies by academics to accelerate the use of CJK FTA and further needs of studies to examine the impact of CJK FTA outside Northeast Asia.
