Abstrak

The objective of this study is to find out the impact of economic crisis to labor opportunities and to identify the major commodities of agricultural sector in Sulawesi. By using the Input-Output analysis, the economic crisis have given the negative impact by 14.8 percent, and decreasing the labor opportunities in Sulawesi. The decreasing also accured almost at aech sector, except mining. Agricultural sector decreased by 15.7 percent. The role of agricultural sector is very important to appropriate labor opportunities. Therefore, every effort to increase the capability of agricultural sector in creating employments are important. One the effort is to choose the strategic commodities. The study shows that the commodities which have greater labor obsorptien are: rice, corn, orange, onion, garlic and sea fish.
