

**Judul:**

Applicability of an oligonucleotide probe in radioisotope  $^{32}\text{P}$ -based dot blot hybridization for detection of hepatitis C virus in large sample numbers: a preliminary study

**Pengarang/Penulis:**

**Subjek:**

Hepatitis C virus

**Nomor Panggil:**

pdf

**Penerbitan:**

[Fakultas Kedokteran Universitas Indonesia, National Nuclear Energy Agency, Jakarta. Center for Application of Isotopes and Radiation Technology]
