

Judul:

Absorpsi gas CO₂ melalui kontaktor membran serat berongga menggunakan larutan penyerap triethaolamine variasi jumlah serat = This study uses tea solution to absorb co₂ from the gas flow through the hollow fiber membrane contactor the aim of this study is to evaluate the hollow fiber membrane performance to absorb CO₂ using tea through mass transfer and hydrodynamic studies du

Pengarang/Penulis:

Fransiskus Adithya Laksono Pribadi, author

Subjek:

Chemistry; Chemical engineering

Nomor Panggil:

S52548
