

Judul:

Implementasi dan analisa kinerja prototipe reliable and secure end to end voice encryption over public mobile network berbasis domain frekuensi menggunakan prosesor ganda di FPGA = Prototype implementation and performance analysis of reliable and secure end to end voice encryption over public mobile network based on frequency domain using dual processor in FPGA platform

Pengarang/Penulis:

Yohan Suryanto, author

Subjek:

Mobile communication systems

Nomor Panggil:

T38708

Penerbitan:

Fakultas Teknik Universitas Indonesia
