

Judul:

Peningkatan kadar dan rasio mangan pada bijih mangan lokal kadar rendah melalui proses benefisiasi dengan variabel temperatur pada reduction roasting = The enhancement of manganese grade and its ratio from local low grade manganese ore through beneficiation process with the variation of temperature on reduction roasting process

Pengarang/Penulis:

Satrio Amarela, author

Subjek:

Manganese; Ferromanganese; Roasting (metallurgy)

Nomor Panggil:

S63231

Penerbitan:
