

Judul:

Earthquake response of chimney structure connected laterally with flexible tie rods to the inner flues with elastomeric rubber bearing =
Respon seismik struktur cerobong terkoneksi fleksibel tie rods secara lateral terhadap inner flues dengan elastomeric rubber bearing

Pengarang/Penulis:

Wednesson Lawijaya, author

Subjek:

Structural engineering; Chimneys; Seismic; Earthquake forces

Nomor Panggil:

S65743

Penerbitan:
