

Judul:

Penilaian risiko desain sistem penanganan dan penyimpanan bahan bakar reaktor daya eksperimental tipe high temperature reactor 10 dengan metode hazard and operability study di Badan Tenaga Nuklir Nasional = Risk assesment on fuel handling and storage design system of experimental power reactor with high termperatur reactor 10 type using hazard and operability study in national nuclear energy agency

Pengarang/Penulis:

Rusbani Kurniawan, author

Subjek:

Risk assessment; High temperature reactor

Nomor Panggil:

T46537

Penerbitan:

Fakultas Kesehatan Masyarakat Universitas Indonesia
