

Judul:

Peningkatan kadar dan rasio pasir kromit kadar rendah melalui proses benefisiasi dengan variabel jumlah penambahan reduktor coal dan aditif caco3 pada reduction roasting = The enhancement of local low grade chromite sand through beneficiation process with the variation of reductant coal and caco3 as additive dosage on reduction roasting process

Pengarang/Penulis:

Agis Rahma Faradila, author

Subjek:

Chromite; Sands; Steel

Nomor Panggil:

S66501
