

***Judul:***

Studi perbandingan sistem struktur vierendeel dan balok menerus terhadap gaya gempa pada jembatan baja pejalan kaki dengan analisa respon spektrum = Comparative study of vierendeel and continuous beam structural system againts earthquake force on pedestrian steel bridge with response spectrum analysis

***Pengarang/Penulis:***

Hansel Loshaless, author

***Subjek:***

Iron and steel bridges -- Design and construction; Bridges -- Design and construction; Earthquake resistant design

***Nomor Panggil:***

S68286

***Penerbitan:***
