

Judul:

Pengaruh posisi pengelasan chain straight dan zig-zag terhadap kekuatan produk struktur ringan longitudinal square honeycomb corrugated core sandwich panels pada pengelasan two-stage refilled micro friction stir spot welding (tfssw) = Effect of welding position at chain straight and zig-zag position on strength of lightweight structure longitudinal square honeycomb corrugated core sandwich panels product at two-stage refilled micro friction stir spot welding (tfssw)

Pengarang/Penulis:

Adika Fawaz Safitra, author

Subjek:

Welding; Aluminum; Friction welding

Nomor Panggil:

S-Pdf

Penerbitan:
