

Judul:

Evaluasi Kinerja Narrowband Internet of Things (Nb-IoT) Pada Kondisi Stabil Berdasarkan Probabilitas Pengiriman Paket Dan Pemanfaatan Backoff Window = Performance Evaluation of Steady-state Condition in Narrowband Internet of Things (NB-IoT) Based on Packet Transmission Probability and Backoff Window Utilization

Pengarang/Penulis:

Hamonangan Kinantan Prabu, author

Subjek:

Wireless communication systems--Design.

Nomor Panggil:

T53104

Penerbitan:
