

Judul:

Kelayakan teknis dan lingkungan abu insinerator untuk beton (uji tekan beton struktural $f_c = 350 \text{ kg/cm}^2$ dan beton non struktural berupa paving block) = Technical and environmental feasibility of municipal solid waste incineration residues for concrete material (compressive strength test of structural concrete $f_c = 350 \text{ kg/cm}^2$ and paving block as non structural concrete

Pengarang/Penulis:

R. Belanto Hadiwido, author

Subjek:

Municipal Solid Waste

Nomor Panggil:

T2582

Penerbitan:

Program Pascasarjana Universitas Indonesia
