

Judul:

Hubungan Diameter dan Angka Oklusi Vena Saphena Magna Terhadap Revised Venous Clinical Severity Score (r-VCSS) Pasca Tindakan Endovenous Laser Ablation (EVLA) pada Pasien Insufisiensi Vena Kronik = Correlation between Diameter and Occlusion Rate of Great Saphenous Vein on Revised venous Clinical Severity Score (r-VCSS) After Endovenous Laser Ablation (EVLA) in Chronic Venous Insufficiency Patient

Pengarang/Penulis:

Ivan Rinaldi, author

Subjek:

Venous Insufficiency--diagnosis

Nomor Panggil:

SP-pdf

Penerbitan:

Fakultas Kedokteran Universitas Indonesia
