

Judul:

Studi Variasi Genetik Gen Angiotensin Converting Enzyme terhadap Tingkat Risiko Penyakit Hipertensi dan COVID-19 sebagai Rancangan Pendahuluan pada Terapi Presisi (Model: Populasi Palu-Sulawesi Tengah) = Study of Genetic Variations in the Angiotensin Converting Enzyme Gene on the Risk Level of Hypertension and COVID-19 as a Preliminary Design for Precision Therapy (Model: Palu-Central Sulawesi Population)

Pengarang/Penulis:

Ingrid Faustine, author

Subjek:

Angiotensin converting enzyme–Genetics; Hypertension–Genetic aspects; COVID-19 (Disease)–Genetic aspects; Precision medicine

Nomor Panggil:

D-pdf

Penerbitan:

Fakultas Farmasi Universitas Indonesia
